Quit out of all applications. Insert the **Mattenee** Installation disk into your disk drive and double click on the Mattenee icon on the desktop.

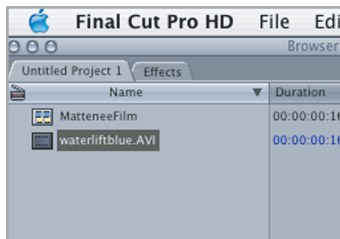

Double-click on the file named **Mattenee –FinalCutPro4-1.0r1.pkg** and follow the on-screen instructions.

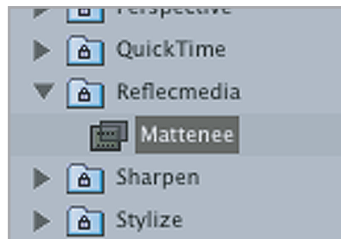

Select the Hard disk you want to install Mattenee onto (Note. You may have more than one Hard disk) then click **Continue.**

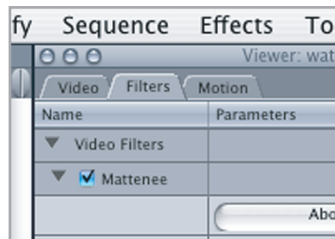

To start the installation click **Upgrade**. Authenticate the installation by typing your username and password, then click **Continue**..

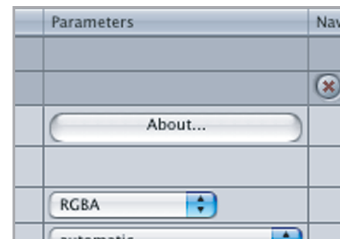

After the plug-in is installed open Final Cut Pro.

In the Effect tab select folder **Reflecmedia** and double click on **Mattenee** plug-in.

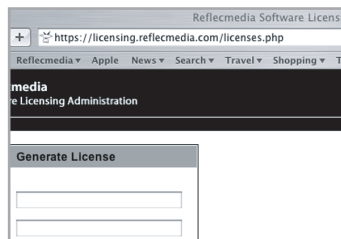

Select the **Filters** tab within the Viewer window.

Click on **About** from within the Mattenee plug-in.

Note down the Hostid text.

Quit out of Final Cut Pro. Using your Internet browser, type the address **https://licensing.reflecmedia.com**

Fill in the necessary information including the serial number from the Mattenee box and the Hostid that was noted down from within Final Cut Pro.

You will be emailed with a **license.txt** file. Once you have been emailed, save the license.txt file to **Applications/Reflecmedia** on your local hard disk. Authentication will be needed, so enter the username and password.

Mattenee will now be fully installed.
